

## CONTENTS

- 1      Algorithmic Reinforcement and the Co-Evolution of User Preferences Through a Mechanistic Analysis of Diversity Loss in Recommender Systems  
**K. Nowak**
- 9      The Application of IoT-Empowered Intelligent Control System for High-Speed Dispersing Equipment in Textile Printing and Dyeing Additives Production  
**Dongmei Shi**
- 16     Modification of High-Precision Conductive Shielding Mylar Material and Research on Intelligent Die-Cutting Technology  
**Quanzhen Ding**
- 22     Modular Design-Driven Lightweight Deployment Suite for SMEs' SAP System: Development, Performance Optimization, and Industrial Validation  
**Qiang Fu**
- 29     Carbon Emission Reduction Estimation and Practice of Energy-Saving Retrofit of Air-Cooling System in Thermal Power Plants  
**Liqin Liu**
- 36     Adaptation Design and Empirical Research of Lightweight ERP Systems for Small and Micro Enterprises  
**Wanyu Li**
- 43     Root Cause Tracing Algorithm and One-Click Repair Mechanism for Medical Server Failures  
**Zhengyang Qi**
- 49     The Construction and Empirical Study of a Brand Marketing Information Technology Maturity Model for Small and Medium-Sized Enterprises  
**Yanxin Zhu**
